VLSI CLASSES: Lab 1 - Setting up UNIX environment for Cadence and Synopys for

ECE 4140/4150/6240/6250/6213/6214/6216

-- Note:
These instructions will setup your environment for use with:
      Cadence, Synopsys, ADS with ON/AMI 0.5 um technology

=== SETTING
UP CADENCE & SYNOPSYS FOR THE FIRST TIME
===

1. Make sure you have an active SEAS account.

   -If you do not have a SEAS account, go to room 401 to obtain one before continuing

 2. Open a terminal window. Right click anywhere on the desktop, choose "Open Terminal"

 3. Once the terminal opens, you will see a "$" this is the system prompt.
    At the "$" prompt, type the following 3 commands:
   (Note: the following links may be changed due to the IT management update)
    (IF YOU SEE ANY ERRORS, show them to your GTA immediately)

   /home/seas/vlsi/course_all/student_env_setup/vlsi_2018.update_profile_cadence
   /home/seas/vlsi/course_all/student_env_setup/setup_cadence . ~/.profile

 4. Startup Cadence

     cd ~/cadence
     virtuoso &

    (IF YOU SEE ANY ERRORS, show them to your GTA immediately)
